Cannon 38999-Style Class G Space Grade Connectors
38999-Style Class G Space Grade Series Connectors

The Challenge

Our traditional and longest served Space System customers approached ITT Cannon regarding the deployment of 38999-Style class G connectors that are designed to be comparable to Thermal Vacuum Outgassing requirements of Mil-DTL-38999. These requirements mandated “all non-metalic materials shall not release greater than 1.0% total mass loss (TML) and 0.1% collected condensable material (CVCM).” These customers knew that ITT Cannon historically manufactured highly capable space grade connectors, but specific materials used in the manufacture of Cannon 38999-Style connectors disqualified the products from the class G requirements.

The ITT Cannon Solution

Addressing the needs of our customers, ITT Cannon implemented a special potting and lubricant material designed to be comparable to the TML and CVCM requirements of Mil-DTL 38999. Cannon achieved outgassing of the connectors by baking at 350 degrees for 48 hours. These changes, coupled with ITT Cannon's innovative and proven 38999-Style design, resulted in a low cost, Space Grade connector.
Overview

Since our pioneering Cannon AF Plug was used on the first DC-1 transport plane in the 1930s, ITT Cannon has designed and manufactured custom interconnect solutions for the aerospace industry. Today, we support global space initiatives with one of the industry's broadest portfolios of high reliability connector solutions for mission critical commercial and defense-related applications. Our extensive custom engineering capability provides unrivaled support and experience for space exploration.

ITT Cannon's 38999-Style Class G miniature connectors offer high density configurations designed and manufactured for high reliability and vacuum conditions. These interconnects are engineered to be comparable to Mil-DTL 38999, while supporting a wide variety of layouts.

38999-Style Class G Performance Summary

<table>
<thead>
<tr>
<th>Specification</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Temperature Range</td>
<td>-65 deg C (-85 deg F) to 200 deg C (392 deg F).</td>
</tr>
<tr>
<td>Contact Sizes</td>
<td>12 to 22D.</td>
</tr>
<tr>
<td>Wire Accomodations</td>
<td>12 to 28 AWG.</td>
</tr>
<tr>
<td>Durability</td>
<td>500 cycles of mating and unmating, 250 cycles for series II with spring fingers.</td>
</tr>
<tr>
<td>Coupling</td>
<td>Series I and II Bayonet. Series III Threaded.</td>
</tr>
<tr>
<td>Corrosion Resistance</td>
<td>48 hours salt spray.</td>
</tr>
<tr>
<td>Vibration</td>
<td>Sine- up to 60 G's, series I &amp; III at rated temperature. Random- 43.7 Grms at rated temp- series III, 49.5 Grms at ambient temp- series I &amp; III, 43.7 Grms at ambient temp- series II.</td>
</tr>
<tr>
<td>EMI Shielding</td>
<td>EMI leakage attenuation, greater than 90dB at 100 Mhz, greater than 65dB at 10 Ghz.   Shell to shell conductivity 1.0 millivolt max resistance.</td>
</tr>
<tr>
<td>Thermal Vacuum Outgassing</td>
<td>Total mass loss 1.0%, collected volatile condensible material 0.1% max.</td>
</tr>

38999-Style Class G Space Grade Series Connectors

"Cannon Plugs," Your Historical Choice for Critical Space Applications

We understand the choices relevant to correctly specifying a Space Grade connector. When critiquing the market of available products, note the one company with more than a century of interconnect solutions experience: TT Cannon. Proudly boasting participation on every free world space mission, Cannon connectors have brought the universe to our doorstep through missions to the Moon, Mars, and beyond. With unparalleled quality, innovative engineering excellence and globally deployed manufacturing capabilities, ITT Cannon welcomes your critical space missions and provides an unequaled, qualified partnership to our valued customers.

Product Features
- Lightweight aluminum shells and copper alloy contacts
- Variety of layouts as described in Mil Standard 1560
- Offering the shell styles currently provided with the standard product line
- Operating temperature of -65 deg C to 200 deg C
- Durability of 500 mating cycles
- Available in series I, II, and III

Benefits To Customers
- Low cost space grade connector system
- Proven track record for reliability and quality
- Military qualified
- Designed to be comparable to Mil-DTL-38999
- High Density Requirements
- Distribution inventory position
- Standard M39029 contacts utilized
