MOVE™ Modular Series

True modularity in a circular interconnect.
Delivering power, signal and data in a single connector.

As a leader in rail interconnects ITT Veam has developed a unique modular circular connector series for today’s and tomorrow’s global rail industry.

The MOVE™ series provides the ultimate in modularity by utilizing a range of snap in modules that enables a variety of contact layouts and the ability to deliver power, signal and data in the same connector. Toolless assembly and installation makes MOVE extremely quick and simple to work with, and the minimized component requirement delivers cost and time efficiencies throughout the supply chain. With a unique ultra secure bayonet coupling mechanism and a circular form factor that minimizes weight and footprint size, you can rely on ITT Veam’s MOVE series to deliver when it matters most.

Features:
• Power, signal and data in a single connector
• Minimized component requirement delivers time and cost efficiency
• Quick and simple toolless assembly and installation
• Unique ultra secure bayonet coupling mechanism
• Minimized weight and a space saving footprint
• RoHS compliant ruggedized plating options including best in class Blue Generation (T240) and Black Epoxyurethaneic Varnish (T39)

The ITT Veam Difference:
• Global capabilities and local support
• Proven application expertise
• Over 60 years rail interconnect leadership
• A committed innovator and business partner

Example Applications

INTERVEHICLE
UNDER CAR
RAILWAY INFRASTRUCTURE
Why ITT
ITT is a focused multi-industrial company that designs and manufactures highly engineered critical components and customized technology solutions. ITT’s Veam brand is a leading global manufacturer of connector products serving international customers in transportation end markets. ITT’s Connector business, which also includes the Cannon and BIW Connector Systems brands, manufactures and supplies a variety of connectors and interconnects that make it possible to transfer data, signal and power in an increasingly connected world.
